

AI-Powered Customer Support and Service Automation

1. Customer Segments

E-commerce, Banks, Healthcare, Telecom, Education, SaaS, 24/7 support users.

2. Jobs-to-be-Done

Resolve queries quickly, automate repetitive tasks, reduce wait time, improve satisfaction.

3. Triggers

High inquiry volume, long response times, rising costs, need for 24/7 service.

4. Emotions

Before: Frustrated, confused. After: Satisfied, confident, loyal.

5. Available Solutions

Human agents, email, call centers, FAQs, rule-based chatbots, live chat.

6. Customer Constraints

Budget, AI expertise, privacy, integration, connectivity.

7. Behaviour

Search FAQs, use chat, email, phone, apps, social media.

8. Channels

Online: Website, chatbot, app, email, WhatsApp. Offline: Call centers, stores.

9. Root Cause

Manual support is slow, costly, and inconsistent.

10. Your Solution

AI chatbot, NLP, ticket automation, CRM integration, multilingual 24/7 support, analytics.
